

Thursday the 8th of July, 2021

The fragility of the corporate sector is usually assessed with traditional indicators related to the financial situation of companies such as insolvency, default, and bankruptcy. However, there are alternative indicators for studying the activity of the productive sector that do not usually receive much attention. This article analyzes the start-up and closure of companies in Colombia, which is part of Box 2 in the Financial Stability Report for the first half of 2021.
